Portfolio

fadlyalfarizy.my.id

SKILLS

Web

React, TypeScript, Tailwind CSS,
Framer Motion, Next.js, Vite

Backend & Deploy

Supabase, Vercel

Game Development

Learning: Unity, car physics, low-poly
art, Android

Workflow

AI-assisted development

EDUCATION

Junior High School (SMP)

Grade 9 · 2026

PROFILE

Web developer chasing a dream of becoming an indie game developer. I build everything hand in hand with AI and spend my free time learning to make both games and websites. I built my portfolio site while in 9th grade.

PROJECTS

FRL Broadcast WEB APP

frlcast.my.id

Race control, live timing, and OBS overlays for FR Legends leagues, all from one console, plus an Android driver app.

Supabase · OBS overlays · Android

Zatory Racing WEBSITE

zatory-racing-website.vercel.app

The official website of Zatory Racing Team, a virtual racing team competing in Assetto Corsa and MotoGP, with team news, a gallery, and driver profiles.

Vite · Vercel

PolyGrip GAME · IN DEVELOPMENT

An Android racing game with simulation-style car physics and clean low-poly graphics, with an F1 car and a Hypercar so far. The early F1 demo has touch controls, DRS, and tire temperature and wear.

Unity · Android · Car physics · Low poly

Personal Portfolio WEBSITE

fadlyalfarizy.my.id

This bilingual (Indonesian/English) portfolio with scroll-driven animations, built with AI assistance.

React · TypeScript · Tailwind CSS · Framer Motion
